## EXPERIENCE

### **OLT Internazionale, ILORIN— *Frontend Developer***

September 2022 - present

- was able to build eye-Catching designs without the need of a designer
- was able to create a browser app that functions like the Google chrome and it's growing rapidly fast amongst it's users
- was able to integrate my knowledge of HTML, CSS and JavaScript to build a tracker app which allow it's users to keep track of their activities thereby solving time wasting problems

### **AFT MEDIA, (REMOTE )— *React Developer***

June 2024 - November 2024

- was able to put my skills into real life application by constant solving of problems
- was able to make good react interfaces that attracted 90% of it's viewers to me
- Was able to make use of the APIs using RapidAPI thereby solving about 60-70% of the backend works.
- Was able to create an idea which translated to the building of the PRESCRIBTO web app( a personal project which solved over a thousand people's health issues with busy schedule)

### **GIANO LTD, (REMOTE) — *Senior Frontend Developer***

May 2023 - December 2024

- Was able to partner with different people such as Designers, backend developer, Product designers and so on to boost my effectiveness working as a team.
- Was able to convert figma designs to frontend codes with readable comments describing some functionality, making it easy for other people to continue or better do some addition or subtraction.
- Was able to host about 5-6 company projects on different hosting platforms with good hosting packages at a minimal cost making sure funds are being managed.

## SKILLS

HTML, CSS, JavaScript, React proficient in libraries such as ( Material UI, Aceternity UI, chakra UI, and tailwindcss), Typescript, Responsiveness, API integration, and a little knowledge on backend application

## AWARDS

- Received an award of excellence
- Received an award of leadership in the department
- Received an award of honor .

## LANGUAGES

English, Yoruba and little knowledge on French and Spanish

## EDUCATION

### **Chapel Secondary School, Ilorin — Senior School Certificate Examination (SSCE)**

September 2019 - July 2022

- Was one of the prefects of the school, which tailored my leadership skills on a very low scale for future use.

### **Federal University Technology Akure, Ondo state— (Bachelor's degree in Computer Engineering)**

May 2023 - Present

- Was able to meet with different people and everyone in my department making contact with them thereby building good communication skills.

## PROJECTS

### **Prescribto — A web app that allows people with health problem book an appointment with a Doctor for a session whose profile will be displayed on the app and the doctor will have a page to either accept or reject it depending on his schedule**

- The web app was able to solve over 80% of the users health issues with busy schedule
- It creates an online platform for better discussion with the Doctor thereby saving time, resource and energy wasting to the hospital.
- The process of the project was demanding and also impactful in that I was able to debug a lot of errors in my code countless times thereby sharpening my debugging skills
